Lesson 16: Creative Collaboration

1. What does "collaboration" mean?

a) Working alone on a project

b) Working together with others

c) Competing with others to win

d) Avoiding teamwork

2. Which tool is used for collaborative drawing?

a) Paint

b) MS Word

c) FlockMod

d) Notepad

3. What appears next to a person's work when they draw in FlockMod?

a) Their email address

b) Their group code

c) Their password

d) Their nickname

4. Which key is used to save your work in FlockMod?

a) Ctrl + S and saved in FlockMod automatically

b) Print Screen and paste in paint

c) F2

d) Alt + Tab

5. Which activity is an example of physical collaboration?

a) A video meeting

b) Using FlockMod

c) Group projects with friends

d) Editing a Google Doc with others

6. Digital collaboration allows people to work together regardless of:

a) Time zone and location

b) Internet connection

c) Room size

d) Number of students

7. What is the primary resource needed for participating in digital collaboration?

a) A pencil and paper

b) A computer with internet access

c) A set of watercolor paints

d) A collection of art books

8. Which is correct about physical and digital collaboration is correct?

a) Physical always needs internet

b) Digital always needs face-to-face

c) Physical is in-person, digital is online

d) Both need same classroom

9. A student tries to join a FlockMod room but fails repeatedly. What is the most likely cause?

a) No FlockMod account

b) No teacher approval

c) Only works on school networks

d) Wrong room name

10. A group of students from three different cities wants to create a real-time drawing together. Which is the best solution?

a) Meet physically at one location

b) Use digital collaboration

c) Send individual drawings via email

d) Draw offline and share photos later

Answers

1.b	2.c	3.d	4.b	5.c	6.a	7.b	8.c	9.d	10.b

Lesson 17: Using Collaboration Software for Research

1. What is collaboration software?

a) Software used for editing photos

b) Software that enables people to work together in real-time

c) Software used for playing games

d) Software for offline document creation

2. Which of the following is an example of collaboration software?

a) MS Access

b) MS Paint

c) Shout

d) VLC Media Player

3. Which feature is commonly found in collaboration software?

a) Real-time file sharing

b) Offline-only access

c) Automatic video editing

d) Playing background music

4. Google Docs is mainly used for:

a) Creating and editing images

b) Hosting online video conferences

c) Real-time document collaboration

d) Downloading large files

5. Zoom is primarily used for:

a) Coding and programming

b) Playing recorded lectures only

c) Drawing and sketching

d) Video conferencing and virtual meetings

6. How does collaboration software improve team productivity?

a) By enabling real-time communication and coordinated work

b) By reducing the number of shared files

c) By forcing teams to work individually

d) By requiring constant in-person meetings

7. A teacher wants students' break-time activity preferences quickly. What is the best way to get results quickly?

a) Ask individually and count manually

b) Use an online poll that shows results instantly

c) Give printed questionnaires and compile later

d) Hold a group discussion and record manually

Answers

1.b	2.c	3.a	4.c	5.d	6.a	7.b

Lesson 18: An Introduction to Data Capture

1. What is the best definition of data?

a) Facts or statistics collected for reference or analysis

b) Random guesses and opinions

c) Only numbers used in mathematics

d) A list of books and authors only

2. Which of these is an example of data?

a) A photo

b) A name

c) A number

d) All of the above

3. Why is data capture important?

a) To confuse researchers

b) To ensure accurate and organized information for analysis

c) To delete unnecessary facts permanently

d) To make information harder to find

4. Which of these is NOT a method of data collection?

a) Surveys

b) Interviews

c) Guessing without evidence

d) Observations

5. In which situation is an "observation" method mostly used?

a) Scientific research

b) Online chatting

c) Gaming

d) Shopping

6. When capturing data about a smartphone, which of the following is a non-physical fact?

a) Screen size

b) Price

c) Color

d) Weight

7. Which of the following statements about surveys is TRUE?

a) Surveys are only done face-to-face

b) Surveys cannot be conducted online

c) Surveys collect data from a large number of people

d) Surveys are less reliable than random guessing

8. When conducting an interview for data capture, which factor ensures the highest reliability of data?

a) Asking leading questions

b) Skipping irrelevant responses

c) Recording only what you assume

d) Maintaining neutrality

Answers:

1.a	2.d	3.b	4.c	5.a	6.b	7.c	8.d

Lesson 19: Different Data Sources

1. Which of the following technology can be used to capture data electronically?

a) Fingerprint scanner

b) Barcode scanner

c) QR Code scanner

d) All of the above

2. Which of these is a physical data source?

a) Newspaper

b) Facebook post

c) YouTube video

d) Online survey

3. Which of these is a digital data source?

a) Websites

b) Online survey

c) Database

d) All of the above

4. What is the purpose of physical data sources?

a) To confuse the people

b) To gather data through observation or experimentation

c) To share memes

d) To delete old data

5. Which technology is used to capture data by scanning black and white squares?

a) Barcode reader

b) Fingerprint scanner

c) QR code scanner

d) Camera

6. Which of the following is an example of captured school data?

a) Teacher's opinions

b) Attendance register

c) Students' doodles

d) School bell sound

7. Which of the following is an advantage of digital data sources over physical ones?

a) They can be touched and felt

b) They provide real-time and accessible data

c) They are cheaper to print

d) They cannot be shared

8. A shopkeeper scans a product before billing. Which data capture method is being used?

a) Observation

b) Interview

c) QR code on tickets

d) Barcode reader

9. A researcher wants to study ancient civilizations using real artifacts. Which data source would provide the most authentic insights?

a) Physical artifacts in museums

b) Social media blogs

c) Online discussion forums

d) Digital history videos

10. What does the abbreviation QR stand for?

a) Quick Response

b) Quality Recognition

c) Quantum Relay

d) Quick Relay

Answers:

1.d	2.a	3.d	4.b	5.c	6.b	7.b	8.d	9.a	10.a

Lesson 20: Using Data to Make Decisions

1. What does decision making mean?

a) Ignoring options

b) Choosing the best action

c) Asking others to decide

d) Copying someone's choice

2. Which of these is an example of data-driven decision-making?

a) Watching a random movie

b) Choosing lunch by guessing

c) Playing a game for fun

d) Selecting a school club using survey results

3. How does data help in predicting outcomes?

a) By creating games

b) By analyzing patterns and trends

c) By guessing randomly

d) By ignoring the past

4. Which of the following best describes what a comparison website does?

a) It gathers data from other websites and compares the results

b) It creates its own data from scratch

c) It stores data but does not use it

d) It only shows advertisements

5. What is a filter in the context of searching online?

a) Blocks websites

b) Refines a search

c) Online advertisement

d) Changes website theme

6. What does a parameter usually represent?

a) A color option

b) A boundary or limit

c) A brand name

d) A website layout

Answers:

1.b	2.d	3.c	4.a	5.b	6.b

Lesson 21: Creating a Database

1. What is the main use of a database?

a) To write poems

b) To create posters

c) To store and organize data

d) To browse the internet

2. What does a record in a database show?

a) Information about an item

b) Titles of table

c) All items together

d) Random notes

3. Which is an example of a field?

a) Teacher desk

b) Classroom wall

c) School timetable

d) Student name

4. Why should data be organized clearly?

a) To use color

b) To look fancy

c) Easy to understand

d) For decoration

5. Which software is made for databases?

a) Paint

b) MS Word

c) PowerPoint

d) MS Access

6. Which is a real-life use of databases?

a) Library catalog

b) Class notebook

c) Bulletin board

d) Wall poster

7. Which fields are useful in a shop?

a) Shop color, Hobby

b) Item, Price, Stock

c) Lamp, Fan, Desk

d) Teacher, Student, Pen

8. Which is an example of unstructured data?

a) Author catalog

b) Class timetable

c) Marksheet table

d) Jumbled recipe list

9. Which of the following holds all data together?

a) Record

b) Field

c) Table

d) Query

Answers:

1.c	2.a	3.d	4.c	5.d	6.a	7.b	8.d	9.c

Lesson 22: Organising Data Using a Database 1

1. Which of the following numbers comes first when sorted in ascending order?

a) 45

b) 12

c) 78

d) 33

2. If you want to sort a list of names in alphabetical order, which sorting option would you choose?

a) Sort by color

b) Sort by date

c) Sort alphabetically

d) Sort by size

3. Which field helps find cheapest item?

a) Item

b) Stock amount

c) Price

d) Size

4. What tool filters database results?

a) Query

b) Table

c) Column

d) Row

5. Which product gets re-ordered first?

a) Most in stock

b) Least in stock

c) Cheapest item

d) Random pick

6. Sorting stock by largest to smallest shows?

a) Most expensive item

b) Cheapest item

c) Highest stock item

d) Alphabetical list

7. Which is an example of alphabetical sort?

a) Butter, Eggs, Sugar

b) 1, 2, 3, 4

c) 100 to 1

d) Random order

8. What is numerical sorting used for?

a) Alphabets

b) Colors

c) Names

d) Prices

9. What does it mean to "delete" data in a database?

a) Change data to suit your needs

b) Add more data

c) Remove data permanently

d) Sort data

Answers:

1.b	2.c	3.c	4.a	5.b	6.c	7.a	8.d	9.c

Lesson 23: Organizing Data Using a Database 2

1. Which symbol is a wildcard in a query in MS Access?

a) %

b) *

c) #

d) @

2. Why use "*" before and after a word in a query?

a) Search exact matches

b) Find any text containing the word you typed

c) Sort alphabetically

d) Delete other entries

3. When you type '*Apple*' in a query criteria, what will the query show?

a) Only items called "Apple"

b) All items that contain the word "Apple" anywhere in their name

c) All items that start with the letter A

d) All items that end with the letter E

4. What happens when you run a query?

a) The database closes

b) The query shows records that match the criteria

c) The database deletes the table

d) Access creates a new form

5. Which feature allows you to view only certain records without changing the table?

a) Filter

b) Delete

c) Export

d) Format

6. Which command shows query results?

a) Save

b) Run

c) Close

d) Add Table

7. What if you don't add the table to a query?

a) Query works

b) No results appear

c) Table auto-added

d) Database crashes

8. Which is NOT needed for filtering data?

a) Field selection

b) Criterion

c) Wildcard

d) Calculator

Answers:

1.b	2.b	3.b	4.b	5.a	6.b	7.b	8.d

Lesson 24: Using Data to Create New Information

1. What is an expression in a database?

a) A stored value

b) A calculation to create new information

c) A column name

d) A table

2. How do you calculate the value of stock in a query?

a) Price + Stock Amount

b) Price - Stock Amount

c) Stock Amount / Price

d) Price * Stock Amount

3. What is the total value of Butter in stock if price = 1.5 and stock = 8?

a) 14

b) 11.5

c) 12

d) 10

4. Which columns are needed to calculate stock value?

a) Item, Price, Stock Amount

b) Item, Size, Price

c) Item, Price, Size

d) Item, Stock Amount, Weight

5. Which symbol is used for multiplication in a database expression?

a) x

b) *

c) +

d) /

6. What is a row in a table or spreadsheet?

a) A vertical line of cells

b) A horizontal line of cells

c) A single data point

d) A table heading

7. What is a column in a table or spreadsheet?

a) A horizontal line of cells

b) A diagonal line of cells

c) A vertical line of cells

d) A blank space

8. Which feature generates a formatted summary of query data?

a) Report Wizard

b) Query Design

c) Text Filter

d) Table View

9. Columns in a spreadsheet are usually labelled with:

a) Numbers (1, 2, 3…)

b) Letters (A, B, C…)

c) Symbols (!, @, #)

d) Months of the year

10. What is the main purpose of using expressions in a query?

a) To store data

b) To sort alphabetically

c) To delete columns

d) To create new information from existing data

Answers:

1.b	2.d	3.c	4.a	5.b	6.b	7.c	8.a	9.b	10.d

Lesson 25: Exporting to a Spreadsheet

1. Why export data from a database to a spreadsheet?

a) To delete data

b) To create charts and graphics

c) To sort alphabetically

d) To print directly

2. Which tab in Access allows you to export to Excel?

a) Create

b) Insert

c) Home

d) External Data

3. What should you tick when exporting data to keep formatting?

a) Export only values

b) Open destination file

c) Export data with formatting and layout

d) Both b and c

4. If an item is in cell B7, which column is it in?

a) B

b) C

c) D

d) E

5. Which file format is commonly used for exporting data to a spreadsheet?

a) .txt

b) .pdf

c) .xlsx

d) .jpg

6. What key should you hold to select multiple non-adjacent columns for a chart?

a) Shift

b) Ctrl

c) Alt

d) Tab

7. Which Excel tab is used to insert a column chart?

a) Home

b) Insert

c) Formulas

d) Data

8. What formula combines data from two cells in Excel?

a) =A1&A2

b) =A1+A2

c) =SUM(A1:A2)

d) =A1-A2

9. Why is it important to save your work after exporting and creating a chart?

a) To share online

b) To prevent losing data

c) To change colors

d) To print

Answers:

1.b	2.d	3.c	4.a	5.c	6.b	7.b	8.a	9.b

Lesson 26: Spreadsheets: Working Faster with Numbers

1. What is the main advantage of using spreadsheets for calculations?

a) Looks better than calculators

b) Performs repeated calculations quickly

c) Works without form

d) Used only for storing data

2. Which formula is used to add numbers in cell A1 and B1?

a) =A1+B1

b) *A1+B1

c) %A1+B1

d) =A1-B1

3. What happens when you drag the formula from C1 down to C10?

a) It copies only numbers

b) It deletes the previous data

c) It applies the formula to all rows

d) It locks the cells

4. What are the small boxes called in a spreadsheet?

a) Rows

b) Columns

c) Formulas

d) Cells

5. Which symbol is used for division in spreadsheets?

a) ÷

b) /

c) *

d) \

6. If the formula in C1 is =A1-B1, what operation is being performed?

a) Multiplication

b) Subtraction

c) Division

d) Addition

7. Where is the number 749 located in the spreadsheet?

a) D3

b) B9

c) A9

d) C7

	A	B	C
1	A	B	C
2	101	111	123
3	202	222	234
4	303	333	345
5	404	444	456
6	505	555	567
7	606	666	678
8	707	777	789
9	749	888	890
10	909	999	901

8. In a spreadsheet, how are rows numbered?

a) From A to Z

b) From 1 to 10 (numerically)

c) From X to Y

d) From Alpha to Omega

Answers:

1.b	2.a	3.c	4.d	5.b	6.b	7.c	8.b

Lesson 27: Data Modelling: Managing Money

1. What is data modelling in spreadsheets used for?

a) Designing posters

b) Predicting future outcomes using data

c) Editing images

d) Creating animations

2. What is the main advantage of using a spreadsheet for managing money?

a) It looks attractive

b) It works without formulas

c) It automatically calculates and updates

d) It is used only for storing numbers

3. Which formula symbol is used for multiplication in spreadsheets?

a) ||

b) /

c) *

d) -

4. What formula calculates the leftover amount after expenses?

a) =TotalIncome-Expenses

b) =TotalIncome+Expenses

c) =Expenses-TotalIncome

d) =TotalIncome*Expenses

5. What is a running total in spreadsheets?

a) A chart showing expenses

b) A fixed value that never updates

c) A total that changes automatically when new data is added

d) A formula for multiplication

6. Which formula is used to calculate a running total?

a) =CurrentValue+NextValue

b) =PreviousTotal+CurrentValue

c) =Total*Value

d) =Value/Total

7. In spreadsheets, what does the term scenario mean?

a) A possible sequence of events or outcomes

b) A formula for adding data

c) A type of cell reference

d) A graph or chart design

Answers:

1.b	2.c	3.c	4.a	5.c	6.b	7.a

Lesson 28: Effective Data Presentation 1

1. Which feature can be used in a spreadsheet to make tables easier to read?

a) Adding borders and color

b) Changing font color only

c) Using a ruler

d) Removing column headings

2. Why should you add column headings to a table?

a) To make the table look colorful

b) To know what each column represents

c) To reduce file size

d) To make numbers align automatically

3. What does a row of ##### in a spreadsheet cell mean?

a) The data is missing

b) The data does not fit

c) The data is incorrect.

d) The formula is wrong

4. Which icon is used to fill rows or columns with color in a spreadsheet?

a) Borders icon

b) Font size icon

c) Paint bucket icon

d) Alignment icon

5. Why does aligning numbers to the right make them easier to read?

a) It makes the table colorful

b) It hides unused columns

c) It reduces the table size

d) It helps match units properly

6. What should you do if the data in a column is not visible?

a) Delete the data

b) Make the column wider

c) Change the font color

d) Move the data to another cell

7. Which menu allows you to align text to the right in a spreadsheet?

a) Insert menu

b) Alignment menu

c) View menu

d) Page layout menu

8. What is the purpose of adding gridlines to a spreadsheet table?

a) To make the data look colorful

b) To calculate totals automatically

c) To hide unused data

d) To separate rows and columns clearly

9. What tool can you use instead of a ruler when reading numeric data in a spreadsheet?

a) Column headings

b) Formula bar

c) Table formatting

d) Zoom tool

Answers:

1.a	2.b	3.b	4.c	5.d	6.b	7.b	8.d	9.c

Lesson 29: Effective Data Presentation 2

1. Why do we arrange data into charts and graphs?

a) To make data easier to read and analyze

b) To make data look colorful

c) To make files larger

d) To hide unnecessary data

2. Which type of chart shows data as parts of a whole?

a) Line chart

b) Pie chart

c) Bar chart

d) Column chart

3. What is the first step when creating a pie chart in a spreadsheet?

a) Open the Insert tab

b) Add chart labels

c) Change the chart design

d) Highlight the data cells

4. Which option should you select to create a pie chart in Excel?

a) Insert → Table

b) View → Charts → Pie

c) Format → Chart → Pie

d) Insert → Pie → 2-D Pie

5. What does it mean when a chart is described as "dynamic"?

a) The chart looks animated

b) Updates automatically when data changes

c) The chart is saved in a different format

d) The chart needs to be refreshed manually

6. Why might you add percentage labels to a pie chart?

a) To make it more colorful

b) To make the chart larger

c) To compare similar-sized segments

d) To hide unused data

7. What happens in a dynamic chart if you add a new hobby to your spreadsheet data?

a) The chart updates automatically

b) The chart stays the same

c) The chart must be recreated

d) The chart disappears

8. What is the advantage of displaying data using a pie chart?

a) It shows exact values only

b) It shows proportions of the total data easily

c) It displays data in rows and columns

d) It calculates averages automatically

Answers:

1.a	2.b	3.d	4.d	5.b	6.c	7.a	8.b

Lesson 30: Improving a Presentation

1. Why might you use a chart in a presentation?

a) To save paper

b) To make it harder to see

c) To fit more data

d) To visually represent data

2. Why is it important to choose the correct chart type for the data?

a) To make the chart colorful

b) To reduce file size

c) To make the data easier to analyze

d) To hide incorrect data

3. What should you do if a column heading is not fully visible in a spreadsheet?

a) Delete the heading

b) Change the chart style

c) Make the column wider

d) Hide the column

4. If there are extra spaces between data entries in a spreadsheet, what should you do?

a) Leave them as they are

b) Improve alignment

c) Change the font color

d) Add more rows

5. What happens to the chart if you delete incorrect rows in the spreadsheet?

a) The chart stays the same

b) The chart updates automatically

c) The chart gets deleted

d) The chart stops working

6. Why should you add a title to your chart?

a) To make the chart colorful

b) To reduce confusion in the spreadsheet

c) To make the chart bigger

d) To describe what the data represents

7. If the existing chart does not suit the data, what should you do?

a) Leave it unchanged

b) Change the chart style or type

c) Delete all data and redo again

d) Hide the chart

8. What is the purpose of sharing your improved spreadsheet with a classmate?

a) To get feedback and make further improvements

b) To copy their work

c) To delete unnecessary data

d) To submit the file early

9. In Excel, what does a worksheet refer to?

a) A saved document

b) An entire spreadsheet file

c) A chart inside a spreadsheet

d) A single page within a spreadsheet file

10. Why is it important to save your work after making changes?

a) To avoid losing improvements

b) To delete old data

c) To reduce file size

d) To change worksheet names

Answers:

1.d	2.c	3.c	4.b	5.b	6.d	7.b	8.a	9.d	10.a

Lesson 1: An Introduction to Computer Networks

1. What is the main purpose of a computer network?

a) To connect and share information

b) To edit documents

c) To install software

d) To record videos

2. Which of the following is NOT an example of a computer network?

a) The internet

b) A company office network

c) Smart home devices connected together

d) A single standalone computer

3. What do computers in a network do?

a) Play games only

b) Print documents automatically

c) Share information and resources

d) Turn on and off by themselves

4. When data is passed across a network, what usually happens?

a) It is always changed

b) It cannot be transferred

c) It always gets deleted

d) It may or may not change

Answers:

1.a	2.d	3.c	4.d

Lesson 2: Network Cables and Connectors

1. What is the main purpose of a network cable?

a) To play music

b) To install software

c) To increase computer speed

d) To connect computers and devices together

2. What is an RJ45 connector commonly used for?

a) Connecting telephones

b) Charging mobile phones

c) Connecting computers in a network

d) Transferring videos from a camera

3. What is an RJ11 connector commonly used for?

a) Telephone connections

b) Internet networking

c) HDMI video transfer

d) Wireless communication

4. How many wires are inside an RJ45 connector?

a) 6

b) 8

c) 4

d) 2

5. How many wires are inside an RJ11 connector?

a) 2

b) 6

c) 4

d) 8

6. Which connector is larger in size?

a) RJ11

b) USB

c) HDMI

d) RJ45

7. Why do cables have connectors at the ends?

a) To store electricity

b) To make them look better

c) To plug them into sockets and devices

d) To protect the wires

8. What is the approximate length of an RJ45 connector?

a) Around 21 mm

b) Around 12 mm

c) Around 9 mm

d) Around 5 mm

9. What is the main difference between RJ45 and RJ11 connectors?

a) RJ45 is for networks; RJ11 is for telephones

b) RJ45 is for audio, RJ11 is for video

c) RJ45 has fewer wires than RJ11

d) RJ45 is wireless, RJ11 is wired

10. Why is it important to understand different types of connectors?

a) To decorate the computer

b) To improve computer color display

c) To know how devices are linked and communicate

d) To make cables longer

Answers:

1.d	2.c	3.a	4.b	5.c	6.d	7.c	8.a	9.a	10.c

Lesson 3: Network Safety

1. What does the word 'hazard' mean in the context of computing?

a) A fun activity

b) Something which can cause an accident

c) A computer virus

d) A new software program

2. Which of the following is a common hazard in a computing classroom?

a) Cables on the floor

b) Computers being turned off

c) Closed windows

d) Teachers walking around

3. Why should drinks not be placed near computers?

a) They improve computer speed

b) They make the desk look messy

c) They can spill and cause an electrical short

d) They cool the computer

4. What can happen if too many plugs are connected to one electrical socket?

a) The computer will work faster

b) The socket can overload and cause a fire

c) The keyboard will stop working

d) Nothing happens

5. What are two common network connectors used in computing?

a) USB and HDMI

b) RJ45 and RJ11

c) Bluetooth and Wi-Fi

d) Ethernet and Fiber

6. Eating food near computers is dangerous because:

a) It leaves crumbs that can attract insects

b) It improves typing speed

c) It increases electricity flow

d) It cools the keyboard

7. Which of the following is an example of a safe computing environment?

a) Multiple plugs in one socket

b) Drinks and food left near computers

c) Damaged cables used for connections

d) Cables bound and away from walking areas

8. What is the main purpose of identifying hazards in a classroom?

a) To create obstacles for students

b) To prevent accidents and ensure safety

c) To decorate the classroom

d) To make computing harder

9. What is a socket in computing?

a) A computer program

b) A hollow area that receives a plug or connector

c) A type of cable

d) A network device

10. Which of the following is the most serious hazard when cables are pinched?

a) Keyboard keys get stuck

b) Internet stops working

c) Computer slows down

d) Fire risk due to exposed wires

Answers:

1.b	2.a	3.c	4.b	5.b	6.a	7.d	8.b	9.b	10.d

Lesson 4: Wireless Connecting 1

1. What are the cables in wireless networks attached to?

a) Computers

b) Phones

c) Wireless transmitters / Routers

d) Tablets

2. What device can be used if a computer cannot receive wireless signals?

a) Router

b) Wireless USB dongle

c) Keyboard

d) HDMI cable

3. What does a wireless transmitter do?

a) Receives signals from devices

b) Converts wireless to wired signals only

c) Stores data on a network

d) Sends signals to computers and devices

4. What is a receiver in wireless networking?

a) A device that receives signals from a transmitter

b) A device that sends signals

c) A device to store files

d) A device to increase electricity

5. Which of these can cause a poor wireless signal?

a) Being close to the transmitter

b) Buildings or constructions that absorb the signal

c) Using a dongle

d) A fully charged battery

6. Why might a computer have no signal?

a) No transmitters are nearby

b) The computer is new

c) The keyboard is wireless

d) The computer is connected to power

Answers:

1.c	2.b	3.d	4.a	5.d	6.a

Lesson 5: Wireless Connecting 2

1. What is Bluetooth used for?

a) Sending email

b) Battery saving

c) Wireless connection

d) Fast charging

2. Why must devices be close for Bluetooth?

a) To connect and communicate

b) To weigh devices

c) To boost internet

d) To charge faster

3. First step in pairing Bluetooth devices?

a) Use USB

b) Search device by its name

c) Turn off the devices

d) Increase signal strength

4. Which devices can typically use Bluetooth?

a) Only keyboards

b) Only desktop computers

c) Only printers

d) Mobile phones, tablets, laptops, fitness trackers

5. What does it mean to pair two devices using Bluetooth?

a) Charging

b) Wireless connection

c) Deleting files

d) Installing software

6. Why should the correct cable be used when connecting devices with a cable?

a) Prevent damage

b) Looks neat

c) Faster device

d) Improve Wi-Fi

7. Which of the following is NOT a requirement for devices to pair via Bluetooth?

a) Close devices

b) Powered on

c) Same color

d) Find each other

Answers:

1.c	2.a	3.b	4.d	5.b	6.a	7.c

Lesson 6: Wireless Connecting 3

1. What is a mobile hotspot?

a) A place with public Wi-Fi

b) A charger

c) A wired network

d) USB storage

2. Why be careful when using a mobile hotspot?

a) Faster than home Wi-Fi

b) Charges slowly

c) Data may be unsafe/insecure

d) Drains battery

3. What can you do using a mobile hotspot?

a) Cook food

b) Send messages and calls

c) Print documents

d) Charge devices

4. Why find hotspots in new areas?

a) Connect Cables

b) Make devices heavier

c) Boost battery

d) Access free Wi-Fi

5. Which of these devices can create a mobile hotspot?

a) A landline phone

b) A smartphone

c) A gaming console

d) A printer

6. Main risk of using public hotspots?

a) Increased Wi-Fi speed

b) Slow downloads

c) Device overheating

d) Data insecurity

7. Mobile hotspots usually provide Internet that is:

a) Email only

b) Expensive

c) Wired

d) Free and wireless

Answers:

1.a	2.c	3.b	4.d	5.b	6.d	7.d

Lesson 7: The Internet: How Information is Organised

1. How is information on the Internet organized?

a) Into TV programs

b) Into folders like on your computer

c) Into pages linked by clicks

d) Into USB drives

2. What connects countries and continents for the Internet?

a) Airplanes

b) Cables and wireless signals

c) Satellites only

d) Mobile phones

3. What types of content can you find on the Internet?

a) Only Text

b) Text, pictures, videos, maps

c) Only videos

d) Only games

4. What can links on the Internet be hidden behind?

a) Trees

b) Mountains

c) Pictures and words

d) Clouds

5. Who decides what content appears on the Internet?

a) The person who posts it

b) Internet provider

c) Government only

d) Your computer

6. Which of the following is a popular search engine used to find information on the Internet?

a) Facebook

b) Twitter

c) Google

d) Instagram

7. What is a linked page on the Internet?

a) A webpage connected to another webpage through a hyperlink

b) A webpage that cannot be opened

c) A USB storage page

d) A TV channel

8. Why is understanding how information is organized on the Internet useful?

a) To find and navigate information efficiently

b) To make it harder to find information

c) To limit access to information

d) To create a structured and accessible format

Answers:

1.c	2.b	3.b	4.c	5.a	6.c	7.a	8.a

Lesson 8: Introducing the Internet of Things

1. What does IoT stand for?

a) Internet of Technology

b) Internet of Things

c) Internal online tools

d) Integrated online transfer

2. Which devices can be part of the IoT?

a) Smart refrigerators

b) Driverless cars

c) Baby monitors

d) All of the above

3. What is the main feature of IoT devices?

a) They can send and receive information via the Internet

b) They only store data locally

c) They only run offline games

d) They require physical cables to communicate

4. Why is IoT considered a network of objects?

a) Because objects are connected and communicate using the Internet

b) Because objects are sold online

c) Because objects are only used in factories

d) Because objects are physically linked with wires

5. Why do IoT devices send and receive information?

a) To update and monitor their status

b) To store files permanently

c) To run only video games

d) To charge devices automatically

6. Which is an example of IoT in healthcare?

a) Smart watches for time only

b) Baby breathing monitors

c) Regular thermometers

d) Offline calculators

7. How do smart homes use IoT?

a) To play offline videos

b) To store offline files

c) To control lights, locks, and appliances remotely

d) To connect only one device

Answers:

1.b	2.d	3.a	4.a	5.a	6.b	7.c

Lesson 9: Instant Messaging

1. What is instant messaging?

a) Sending emails slowly

b) Posting pictures on social media

c) Having a conversation in real time

d) Watching videos online

2. Why do people use textspeak in messaging?

a) To make messages longer

b) To shorten messages and type faster

c) To confuse friends

d) To send pictures

3. What is an emoticon?

a) A small image showing feelings or ideas

b) A type of text abbreviation

c) A long email message

d) A video file

4. Which of these is a common text abbreviation?

a) ROFL

b) HTTP

c) PDF

d) CPU

5. When you send an instant message, it is delivered:

a) With a delay of a few days

b) Instantly, within seconds

c) After a week

d) Only on weekends

6. What does real time mean in instant messaging?

a) Messages are sent immediately and can be replied to instantly

b) Messages are delayed for a few hours

c) Messages are scheduled in advance

d) Messages are never received

Answers:

1.c	2.b	3.a	4.a	5.b	6.a

Lesson 10: Message Boards, Blogs and Wikis

1. Which platform allows people to discuss a specific topic with others online?

a) Blog

b) Wiki

c) Forum

d) Social media

2. What is the main purpose of writing a blog?

a) To share opinions and thoughts of the author

b) To organize group projects

c) To edit content collaboratively

d) To create discussion threads

3. How is a wiki different from a blog?

a) It is a personal diary

b) It cannot be shared

c) It is edited and updated by multiple people

d) It only shows recent posts

4. When viewing a blog, which content appears first?

a) Posts with images only

b) Oldest posts

c) Latest posts

d) Random posts

5. Which website is recommended for students to explore message boards and blogs safely?

a) wikipedia.org

b) kidzworld.com

c) youtube.com

d) google.com

6. Who can participate and reply in a forum discussion?

a) Only the original poster

b) Any registered user

c) Only moderators

d) Only the teacher

7. What is a key feature of a wiki page?

a) Only one person can write

b) Posts cannot be edited

c) It shows content in reverse chronological order

d) Multiple users can update and add content

8. What type of content can you typically find in a blog?

a) Author's thoughts and opinions

b) Only group project work

c) Only links to external sites

d) Only images

9. Why would someone use a forum, blog, or wiki?

a) To store offline files only

b) To learn, share ideas, and communicate online

c) To watch videos exclusively

d) To play games

Answers:

1.c	2.a	3.c	4.c	5.b	6.b	7.d	8.a	9.b

Lesson 11: Organising a Blog Post

1. Why should personal information be avoided in a blog?

a) It makes the blog less interesting

b) It slows down the blog

c) It is illegal to write anything online

d) For safety and privacy reasons

2. When registering a blog account, what is important to consider?

a) Blog color theme

b) Number of emojis available

c) The platform's safeguarding standards

d) How many followers it already has

3. How should students write their blog posts?

a) Independently, after planning

b) Copying from friends

c) Only using images without text

d) Writing personal private information

4. What can be included in a blog post to make it engage?

a) Photos or diagrams related to the topic

b) Personal addresses and phone numbers

c) Random copied text from other blogs

d) Nothing, text only

5. What does it mean to "organize" a blog?

a) Making the blog look messy

b) Arranging the blog posts in a neat and logical order

c) Adding lots of random pictures

d) Deleting all blog content

6. Which of the following is NOT a type of blog?

a) Cooking blog

b) Travel blog

c) Fashion blog

d) Car Manual

Answers:

1.d	2.b	3.c	4.a	5.b	6.d

Lesson 12: Real Time Collaboration

1. What is the main benefit of using collaboration software?

a) It automatically writes the document for you

b) It allows multiple people edit the same document at once

c) It only works offline

d) It prevents anyone else from viewing your work

2. How can you tell who is typing in a collaborative document?

a) By the color highlighting assigned to each person

b) By the number of words typed

c) By the font size only

d) By who logged in first

3. What is required for real-time collaboration on a document?

a) A printed copy of the document

b) Only a USB drive

c) Collaboration software or a shared online document

d) Sending multiple emails

4. What should students do after finishing a collaborative document?

a) Close the browser without saving

b) Print it and never upload again

c) Delete all typed text

d) Save the document

5. How do group members usually get access to the collaborative document?

a) By guessing the website

b) By receiving a URL or invitation from the group leader

c) By opening any document on the computer

d) By emailing the teacher for the password each time

6. Why is each person given a different color when typing?

a) To identify who wrote each part of the document

b) To make the document colorful

c) To match the background

d) To print it in rainbow style

7. Which of these is an example of real-time collaboration software?

a) MS Excel

b) PDF Reader

c) MeetingWords

d) Microsoft Paint

8. Why is real-time collaboration useful in schools?

a) It prevents students from sharing ideas

b) It slows down typing speed

c) It allows teamwork and simultaneous editing

d) It replaces homework completely

Answers:

1.b	2.a	3.c	4.d	5.b	6.a	7.c	8.c

Lesson 13: File Sharing

1. How many KB are there in 1 MB?

a) 10

b) 100

c) 1,000

d) 10,000

2. Which application shows the size of a file?

a) Task Manager

b) File Manager

c) Control Panel

d) Settings

3. Why might an email fail to send an attachment?

a) File is too big

b) Wrong password

c) Computer is slow

d) Too many recipients

4. Which of the following is an example of an online file-sharing service?

a) Google Maps

b) Wikipedia

c) PowerPoint

d) SecurelySend

5. What appears beside the file name after uploading in SecurelySend?

a) Red cross

b) Green tick

c) Blue star

d) Yellow dot

6. Which of the following is an outdated method of file sharing?

a) Email attachments

b) Social media

c) Fax machines

d) USB drives

7. Which of the following is NOT a common file format for images?

a) JPG

b) PDF

c) PNG

d) GIF

8. An email can only handle files up to 1 MB. Which of the following statements is correct?

a) Only small files can be sent

b) All files can be sent

c) No files can be sent

d) Files larger than 1 MB can be sent

Answers:

1.c	2.b	3.a	4.d	5.b	6.c	7.b	8.a

Lesson 14: Holding a Virtual Meeting

1. Which of the following is NOT an advantage of holding a virtual meeting?

a) Saves travel time

b) Reduces costs

c) Allows distant people to connect

d) Guarantees no technical issues

2. What is the main purpose of using video conferencing?

a) To replace email completely

b) To make meetings longer

c) To meet people without the need of physical presence

d) To avoid using cameras

3. Before joining a virtual meeting, what should participants do?

a) Prepare questions in advance

b) Both A and D

c) Avoid talking during the session

d) Be prepared technically

4. In a virtual meeting, two people speak at the same time. What does this show?

a) Virtual meetings are useless

b) Cameras should be turned off

c) Proper management is needed

d) Questions should be avoided

5. What does the term "virtual" mean in this lesson?

a) Not physically existing but appearing real through software

b) Only used for games

c) Physically present in the same room

d) Completely imaginary

6. Which of the following can be a problem during virtual meetings?

a) Using camera

b) Shorter meeting duration

c) Fewer participants

d) Weak internet connection

7. Which of the following could students miss most if schools became fully virtual?

a) Using video applications

b) Meeting friends in person

c) Watching online lessons

d) Asking teachers questions

Answers:

1.d	2.c	3.b	4.c	5.a	6.d	7.b

Lesson 15: Chat Room Safety

1. What is the main danger when using a chat room?

a) You never really know who you are talking to

b) The internet becomes slow

c) It costs money to chat

d) Chats are too short

2. Which of the following should you never share in a chat room?

a) A cartoon avatar

b) Your favorite game

c) Your real name and address

d) A hobby

3. What should you use instead of your real photo online?

a) Passport photo

b) Avatar or image

c) School ID card

d) Webcam picture

4. Why must antivirus software be kept up to date?

a) To block people from joining

b) To change avatars

c) To make chats faster

d) To prevent viruses from unknown links

5. What does "nickname" (alias) mean in online chatting?

a) A name that hides your real identity

b) A long version of your real name

c) Your age in numbers

d) Your school name

6. Even in safe chat rooms, which rule must always be followed?

a) Always share your age

b) Never share personal information

c) Show your real picture

d) Give your school details

7. Why can an avatar be misleading?

a) It shows too much detail

b) It makes chatting difficult

c) It is always cartoon-like

d) It may not match the real person behind it

8. Some chat rooms do not require registration. What is the risk?

a) Safety cannot be guaranteed

b) People chat too fast

c) Nicknames are limited

d) Chats are automatically deleted

9. Why is it dangerous to tell where you live online?

a) It makes the nickname too long

b) It slows down the chat room

c) It reveals personal details to strangers

d) It is not allowed by the software

Answers:

1.a	2.c	3.b	4.d	5.a	6.b	7.d	8.a	9.c
