Lesson 1: Choosing a Presentation Topic

1. **What is the first step in preparing a presentation?**

a) Prepare the slides.

b) Add animations.

c) Choose a topic.

d) Share online.

2. **What does “refine” mean?**

a) Add more details.

b) Reduce to key points.

c) Write long stories.

d) Skip information.

3. **What are some attributes you can include when describing a character?**

a) Their looks, actions, and personality.

b) Their favorite color and food.

c) The author's name.

d) The name of the movie they were in.

4. **Why is a very big topic hard to use?**

a) It is too fun.

b) It has no pictures.

c) It is always wrong.

d) It has too much information.

5. **According to the lesson, what does the term "prioritize" mean?**

a) To add more information.

b) To put things in their order of importance.

c) To refine your list.

d) To write down more facts.

6. **What can you use to learn more about your presentation topic?**

a) A book or trusted website.

b) A random person.

c) A website with no facts.

d) A picture with no information.

Lesson 3: Designing a Presentation

1. What should you include in a presentation design?

a) Layout and images.

b) Random drawings.

c) Passwords.

d) Game scores.

2. Which tool can you use to check facts?

a) Internet.

b) A cartoon TV show.

c) A comic book.

d) A birthday calendar.

3. Why save more images than needed?

a) To confuse teacher.

b) To fill storage.

c) To choose later.

d) To avoid research.

4. What are some things you should think about when designing your slide?

a) The length of the presentation.

b) The title of the presentation.

c) The type of computer you are using.

d) Layout, font style, text, and pictures.

5. What should you aim to do when saving images from the Internet for your presentation?

a) Save only the exact number of images you need.

b) Save more pictures than you need and choose which to use later.

c) Save as few pictures as possible.

d) Don't save any pictures.

Lesson 4: Presenting Information: Software Options

1. Which software is suggested for a presentation?

a) Photoshop.

b) MS-Word.

c) Powerpoint.

d) Google Docs.

2. What is a template?

a) Pre-set design.

b) New file.

c) Password key.

d) Video clip.

3. What should you do after creating slides?

a) Close the presentation.

b) Ignore errors.

c) Delete slides.

d) Save work.

4. What is the main difference between using a blank presentation and using a template?

a) A blank presentation is harder to use.

b) A template already has a design set.

c) A blank presentation does not allow you to add pictures.

d) A template is more expensive.

Lesson 5: Reviewing and Improving a Presentation

1. What kind of suggestions should you give someone when you review their work?

a) Only point out their mistakes.

b) Give helpful suggestions to improve it.

c) Tell them you do not like their work.

d) Change their presentation for them.

2. What is a key part of reviewing someone else's work, besides giving suggestions?

a) Correcting their spelling and grammar mistakes.

b) Deleting their work.

c) Telling them that their work is perfect.

d) Writing on a separate sheet of paper.

Answers

1.b	2.a

Lesson 6: Including Audio and Video in Presentations

1. What is a hyperlink?

a) A special kind of video.

b) A type of font.

c) A way to save your work.

d) A word or picture that acts like a button.

2. How do hyperlinks usually look?

a) Blue, underlined.

b) Red, bold.

c) Green, italic.

d) Black, plain.

3. What happens when you click on a hyperlink?

a) It changes the font of your text.

b) It opens a file, a web link, a video, or an audio clip.

c) It deletes your presentation.

d) It saves your work.

4. When you add a hyperlink to a picture, what happens to the picture?

a) The picture will have a different color.

b) The picture will be underlined.

c) You will not be able to see any difference.

d) The picture will get bigger.

5. What is the name of the tab you click on to apply a hyperlink?

a) Home.

b) Insert.

c) Design.

d) Animation.

Lesson 7: Using Technology Safely: Computer Bugs

1. When a computer is infected by malware, what happens to it?

a) It cannot run properly.

b) It starts to run faster.

c) It can download more files.

d) It becomes a virus.

2. What does it mean when a computer bug "corrupts" a file?

a) It makes the file bigger.

b) It makes the file unreadable.

c) It scrambles the information or deletes part of a file.

d) It makes the file run faster.

3. What is one way a computer bug can get onto a computer?

a) By clicking on infected links on websites.

b) By playing games on the computer.

c) By writing an email to an unknown person.

d) By saving a new document.

4. What is malware?

a) A good program that helps a computer to improve a computer.

b) Code that is written with the intention of harming a computer.

c) A type of computer bug that helps to save files.

d) A math based game you can download and play.

5. What is one similarity between computer bugs and human viruses?

a) Both can make a person sick.

b) Both affect the human body.

c) Both affect different parts of the system.

d) Both are cured by vaccinations.

6. What are some examples of 'utilities' mentioned in the lesson?

a) Built-in games.

b) Keyboard color apps.

c) Chat apps.

d) Tools like antivirus.

7. What is the use of a USB stick?

a) Store computer programs.

b) To change the presentation slides.

c) Edit the images in a presentation.

d) Helps in listening to audio.

Lesson 8: Using Technology Safely: Protecting Your Computer

1. How do computers protect themselves from malware?

a) Using a firewall

b) Using anti-malware programs

c) Using anti-virus software

d) All of the above

2. What's the difference between virus and worm?

a) A virus corrupts files, a worm does not.

b) A worm spreads through networks.

c) A virus is malware, a worm is not.

d) A worm is malicious, a virus is not.

3. What is spyware?

a) A program that steals personal information.

b) A program that sends advertisements.

c) A program that corrupts files.

d) A program that spreads on networks.

4. What does a Trojan virus do?

a) It warns you about bad websites.

b) It pretends to be something safe so you install it.

c) It repairs damaged computer files.

d) It blocks all other viruses automatically.

5. What does an anti-malware program "scan"?

a) It deletes all files.

b) It makes the computer run faster.

c) It checks files and emails for safety.

d) It makes the computer run slower.

6. What is adware?

a) A program that steals personal information.

b) A program that sends advertisements.

c) A program that corrupts files.

d) A program that spreads on networks.

7. What does a firewall do?

a) Protects the computer from fires.

b) Protects the computer from malware.

c) Provides protection from anti-virus.

d) None of the above.

8. You must regularly _____your computer using an antivirus software to detect viruses.

a) Scan.

b) Clean.

c) Wash.

d) Reboot.

Lesson 9: Using Technology Safely: Communication

1. What is Instant Messaging?

a) A conversation using video.

b) A conversation using text.

c) A conversation using a telephone.

d) A conversation with a group.

2. What is one advantage of video chat?

a) It lets you play games while sleeping.

b) It changes your voice automatically.

c) It works without a device.

d) You can see the person you're talking to.

3. What is one disadvantage of instant messaging?

a) It can be very slow.

b) You have to be in room.

c) Misunderstandings can happen.

d) You can't do other things.

4. What is a disadvantage of video chat?

a) There is sometimes a delay.

b) It is hard to see people.

c) You cannot talk to other countries.

d) It is not in real-time.

5. How has technology changed communication?

a) We can only use instant messaging.

b) We can only use video chat.

c) We can talk to people globally.

d) We can only talk to people we know.

6. What is an advantage of instant messaging?

a) You can see the person.

b) You can talk and hear to far-away people.

c) You can work at the same time.

d) You can have a real-time conversation.

Lesson 12: Staying Safe Online

1. What happens when you post a picture online?

a) It spreads quickly

b) It stays private

c) It always deletes

d) It vanishes offline

2. Why can't you ask who friends share it with?

a) Because they won't tell you.

b) You can't talk to them online.

c) You can't talk while filling a book.

d) Because it is rude to ask.

3. What is the importance of privacy settings?

a) They help you make friends.

b) They help keep your profile safe.

c) They help you find people you know.

d) They help you get more likes.

4. Do people know who will see a picture?

a) Yes, they know exactly who.

b) No, because friends of friends see.

c) Yes, because they have privacy settings.

d) The lesson does not say.

5. How does information spread quickly online?

a) When a picture gets a lot of likes.

b) When a person shares a photo.

c) When a person sends an email.

d) When a person talks on video chat.

6. Who might see your comment posted on social media?

a) Friends of friends

b) Only teacher

c) Only family

d) Only classmates

7. Why is it risky to share online?

a) Strangers may see your info

b) Computer might shut down

c) Internet gets slower

d) Teacher will get angry

8. Why is it dangerous not knowing who sees posts?

a) Leads to unsafe sharing

b) Teacher won't mark

c) Internet may crash

d) Friends ignore posts

Lesson 13: Staying Safe Online

1. What is cyber bullying?

a) Bullying that happens in person.

b) Bullying that happens in school.

c) Bullying using technology or online.

d) Bullying that happens at home.

2. What should you do if you are cyber bullied?

a) Keep it a secret.

b) Delete your account quietly.

c) Bully the person back.

d) Tell a trusted adult immediately.

3. What feelings might a victim experience?

a) Happiness.

b) Fear and sadness.

c) Anger and confusion.

d) Hunger and irritation

4. What is the main difference between bullying and cyberbullying?

a) Cyber bullying is worse than bullying.

b) There is no difference.

c) Cyber bullying happens online or with technology.

d) Bullying is in school, cyberbullying is at home.

5. Which of the device can be used for cyber bullying?

a) Television.

b) Phone.

c) Radio.

d) Calculator.

6. What should you do if someone else is bullied?

a) Support them.

b) Ignore it.

c) Join in.

d) Laugh at them.

7. Why is cyber bullying harmful?

a) It spreads quickly online.

b) It entertains others.

c) It saves time.

d) It makes slides better.

8. Which behaviors count as bullying?

a) Answering politely.

b) Sharing toys.

c) Threats, exclusion, rumors.

d) Posting compliments.

9. Why may cyber bullying feel worse than face-to-face?

a) It follows victims everywhere online.

b) It uses fewer words.

c) It ends quickly.

d) It improves grades.

10. What is the best first response to cyber bullying?

a) Report and block immediately.

b) Reply angrily.

c) Ignore permanently.

d) Delete your account.

Lesson 14: Using Technology Respectfully and Responsibly

1. What is personal information?

a) Saved game levels.

b) Notes from a storybook.

c) Random things you write for fun.

d) Details that identify who you are.

2. Why should you keep passwords secret?

a) So you remember them.

b) To make logging in faster.

c) For security from others.

d) To get more likes.

3. What is identity theft?

a) Stealing personal information.

b) Wearing similar clothes.

c) Playing online games.

d) Stealing money.

4. What does shoulder surfing mean?

a) Watching someone type passwords.

b) Tracking a user's online searches.

c) Controlling another person's device.

d) Scanning networks to find open Wi-Fi.

5. Why shouldn't you post holiday dates online?

a) Friends may get jealous.

b) Burglars may target your home.

c) Teacher dislikes it.

d) Internet slows down in your home.

6. What is one safe online rule?

a) Share freely.

b) Keep profile private.

c) Use easy passwords.

d) Post daily.

7. Why should you not post your phone number?

a) It could be misused.

b) It’s too long.

c) Teacher forbids it.

d) It wastes time.

8. Which piece of information is safe to give to your school?

a) Your online passwords.

b) Your exact home location..

c) Your date of birth.

d) Your bank details.

9. Which of the following is safe to share online?

a) Your favourite colour.

b) Your password hint.

c) Your holiday travel dates.

d) Your full home address.

10. Why is it risky to share a full address online?

a) Teachers punish you.

b) Strangers may locate you.

c) Friends won’t visit.

d) It costs money.

11. Why is personal data called “sensitive”?

a) It reveals identity details.

b) It’s always short.

c) It’s written in red.

d) It’s fun to post.

Lesson 15: Managing Your Online Profile

1. What is an avatar?

a) A created image that represents you.

b) A hidden file on websites.

c) A background for your profile.

d) A tool used to edit photos.

2. Why do people use avatars instead of real photos?

a) To match their favourite colours.

b) To avoid showing their real appearance.

c) To make the profile easier to load.

d) To make their account look creative.

3. Which picture is safest for a public profile?

a) A selfie taken yesterday.

b) A photo with your school badge.

c) A cartoon-style avatar.

d) A clear close-up of your face.

4. What could happen if you post a real photo publicly?

a) Strangers could identify you offline.

b) Your friends may not recognize you.

c) Your account colour theme changes.

d) Your device battery drains.

5. Why can edited photos be safer to use?

a) They hide details that reveal your real identity.

b) They work better with filters.

c) They have brighter colours.

d) They load faster than normal photos.

6. What can you customize in avatars?

a) USB drives.

b) Passwords, email.

c) Books.

d) Hair, skin, eyes.

7. Why use avatars in games?

a) Strangers can't see your face.

b) To save space.

c) To get marks.

d) To impress teacher.

8. What tool can create avatars?

a) Cartoonify website.

b) PowerPoint.

c) Antivirus.

d) Calculator.

9. When is it safest to use an avatar?

a) When creating a school poster.

b) When printing a class photo.

c) When strangers can see your profile.

d) When making a science project slide

10. Why is appearance considered personal information?

a) It is a photo.

b) It is fashionable.

c) It can identify you.

d) It is a habit.

11. Why is using avatars safer than real photos?

a) Strangers can't recognize you.

b) It uses less data.

c) It looks colorful.

d) It's quicker to draw.

12. What does avatar use teaches us?

a) Share more pictures.

b) Protect your online identity.

c) Post every day.

Lesson 16: Being Share Aware

1. What happens when you share a photo online?

a) It stays only on your device.

b) Only close friends can see it.

c) It deletes itself after one hour.

d) It can be copied and shared by others.

2. What happens if you delete the original photo you uploaded?

a) All copies disappear too.

b) Shared copies remain online.

c) The website blocks your account.

d) Your friends lose access.

3. What should you never post online?

a) Your pet's photo.

b) Your favorite drawing.

c) Your contact number.

d) A flower from your garden.

4. Who should you talk to if worried online?

a) Classmates only.

b) Strangers on internet.

c) Friends of friends.

d) Trusted adult.

5. What is the Share Aware safety message?

a) Report but don't delete, reply or meet.

b) Talk, chat, message, meet.

c) Post, share, update, send.

d) Block, reply, delete, run.

6. What is a risk of posting something online?

a) It prints on paper automatically.

b) It can spread to people you don't know.

c) It disappears in an hour.

d) Only teachers can view it.

7. What is "share aware"?

a) Being aware of how many friends you have.

b) Being aware of how many pictures you have.

c) Being aware of what you share online.

d) Being aware of what others share.

8. When you share a picture, do you have control?

a) Yes, you have total control.

b) No, because it can be shared.

c) Yes, because you can delete it.

d) Only if you share it publicly.

9. Why must upsetting messages not be deleted?

a) They are evidence.

b) They vanish forever.

c) They save space.

d) They look funny.

10. Why might someone lie about who they are online?

a) To write longer messages.

b) To get better internet.

c) To follow more accounts.

d) To trick someone into sharing information.

Lesson 17: Password Protection

1. What is a password for?

a) Account security.

b) Decoration.

c) Game cheat.

d) Save space.

2. Which is an example of a weak password?

a) A long, random mix of characters.

b) Your name or birthday.

c) A phrase you can easily remember.

d) One that contains numbers and symbols.

3. Which password is weak?

a) animal123

b) Tr3e!House

c) G@laxy9

d) C0mp!uter

4. Which should you never use as a password?

a) A long made-up phrase.

b) A random word.

c) Your birthday.

d) A mix of characters.

5. How does adding symbols improve security?

a) Harder to guess.

b) Makes password longer.

c) Saves typing time.

d) Easier for friends to remember.

6. What should you do with your password?

a) Tell all your friends.

b) Share it with your classmates.

c) Write it on a sticky note.

d) Keep it a secret.

7. Why combine uppercase and lowercase?

a) Adds complexity.

b) Saves memory.

c) Makes it pretty.

d) Faster to type.

8. Why is it important to use different passwords?

a) So you can remember them all.

b) If one account is hacked, others are safe.

c) It is a good way to organize them.

d) Because it is required by law.

9. Why is it important to change passwords often?

a) So you don't forget them.

b) To make it harder for hackers.

c) It is not that important.

d) To make it easier for friends.

10. Why do websites ask for at least 8 characters?

a) To annoy users.

b) To make the password pretty.

c) Longer passwords are harder to guess.

d) To fill more space.

11. What should you do if your password is stolen?

a) Ignore it, nothing will happen.

b) Tell a friend to help you.

c) Change the password right away.

d) Ask for help on social media.
